10. Summary of scientific career to date, including key achievements?

Neuroscience researcher working in the field of Clinical Neurophysiology to understand the intracortical and basal ganglia-motor cortical circuits using non-invasive transcranial magnetic stimulation and deep brain stimulation in patients with movement or mood disorders to treat their conditions effectively and explore the neurobiological effects of neuromodulation.

11. Research Experience

Used non-invasive brain stimulation (transcranial magnetic stimulation, TMS) as an investigative tool to understand the motor cortical circuits as well as treat patients with mood disorders using repetitive TMS during various capacities as PhD student, post-doc scholar and currently as faculty.

12. Awards

6 academic competitive awards including MDS-AOS Junior Faculty award, Prof. James Sharpe award and Prof. Rene Distal Oration Award

13. Publications link : please provide link of pubmed and / or google scholar and / or reserach gate profile
